

PTO SELECTION GUIDE

Version: 18-02-2010 / RVAC

www.hyva.com

The starting point of most hydraulic applications on commercial vehicles is the Power Take Off. This 'P.T.O.' is fitted to the rear or side of the gear box and shifts into gear when operated. Most common operation is pneumatic, however in case a truck is not equipped with an air-brake system a mechanical or even electrical control can be applied. The PTO transfers the force from the combustion engine via a drive mechanism into power to drive a hydraulic system. Points to consider are:

- * What is the position of the PTO provision on the gearbox. Hyva prefers to fit the PTO on the rear or when necessary on the side, Top and bottom mounted PTO's often stand in the way of fitting superstructures or are at risk in off-road conditions;
- * What rotation speed is required to create the required pump flow;
- * What type of pump is fitted, gear- or piston pump, with UNI-3 hole or DIN-4 hole connection;
- * Which drive intervals will be required. Long intervals (over 20 minutes) require a lubrication kit to cool/lubricate the gearwheels. It at all time is advised to fit the output drive shaft below the oil level of the gearbox;
- * The bearing configuration on the parts fitted to the PTO puts a demand on the bearing system of the PTO.

GENERAL:

- * Rpm indicated refers to engine speed;
- * Ratio indicated refers to 1000 rpm engine speed;
- * Torque indicated refers to short term use at (most common) 1500 rpm;
- * Hyva advises to incorporate a safety surplus in torque selection in case engine speed, workload or working time exceeds the assumptions on which we based our calculations (1500 rpm, up to 15 minutes working time, good lubrication, working at intermediate torque and not a high output speed).
In case a generator or blower is fitted we advise to increase the calculated torque by 60% (because of long working interval and high starting torque);
- * The rotation of the PTO is opposite to the rotation of the pump that will be fitted.
- * PTO's required for operation also when the truck is in motion often are fitted on the flywheel or directly on the engine. A clear description is clutch independent PTO's.
The Hyva range is limited to gear box operated/ clutch dependent PTO's;
- * Hyva offers hydraulics to fit on any PTO.

EXPLANATION OF CODES

PTO SELECTION GUIDE

TYPE GEARBOX	Mounting Position	Type Control	Torque (Nm)	Rotation	Speed Normal	Speed Fast	Note	PTO Partnumber	KIT Partnumber	Adapter Partnumber	Quill shaft Partnumber	Switch Partnumber	Output Connect.	
CLARK	1	2	3	4	5	6	6	7	8	9	10	11	12	13

REFERENCE NUMBER	DESCRIPTION
1	Gearbox type
2	Mounting position on gearbox
3	Type of control Pneumatic, Electric or Manual
4	Maximum torque the PTO can handle
5	Rotation direction of the PTO (pump direction should be chosen opposite)
6	Speed of PTO output in normal respectively high gear
7	Note with reference to PTO fitting
8	Ordering code PTO seperately
9	Ordering code Kit seperately
10	Ordering code Adapter seperately
11	Ordering code Quill shaft seperately
12	Ordering code Switch seperately
13	Pump connection

rear	Rear
L	Left
R	Right
Low	Lower

Cw	Clockwise
Acw	Anti Clockwise
C/A	Cw & Acw

P	Pneumatic
M	Manual
E	Electric
H	Hydraulic

3H	UNI 3H
4H	ISO 4H
FL	Flange

NOTES WITH REFERENCE TO PTO FITTING

GENERAL NOTES	
G1	<p>The PTO can only be fitted on gear boxes with an output flange with outside diameter of max 180 mm. The required quill shaft for this PTO is included in the adapter kit. Total allowed torque, sum of both outputs when both are operated at the same time is limited depending on the speed (RPM) and on the time of PTO use. Up to 1500 RPM the maximum torque is:</p> <p>Maximum CONTINUOUS torque = 450 nm. - max. 10 min. continuous work Maximum INTERMITTENT torque = 500 nm. - max. 2 min. continuous work Maximum PEAK torque = 550 nm. - max. 10 sec. continuous work</p>
G2	<p>The PTO can only be fitted on gear boxes with an output flange with outside diameter of max 180 mm. The required quill shaft needs to be ordered separately. When this PTO is mounted ring H=29 which is packed in the quill shaft kit must be eliminated and replaced by the ring H=19 in the adaptor kit (021414010) Total allowed torque, sum of both outputs when both are operated at the same time is limited depending on the speed (RPM) and on the time of PTO use. Up to 1500 RPM the maximum torque is:</p> <p>Maximum CONTINUOUS torque = 450 nm. - max. 10 min. continuous work Maximum INTERMITTENT torque = 500 nm. - max. 2 min. continuous work Maximum PEAK torque = 550 nm. - max. 10 sec. continuous work</p>
G3	<p>Heavy Duty applications (crane, compressor, etc.) require a lubrication kit for which we ask you to contact Hyva.</p>
G4	<p>The PTO can only be fitted on gear boxes with an output flange with outside diameter of max 180 mm. The required quill shaft and studs need to be ordered separately. The PTO is NOT applicable for 4-axle trucks. Total allowed torque when both outputs are operated at the same time is restricted to 600 Nm. Carefully follow instructions enclosed in the package.</p>
G5	<p>Please check the PTO does not interfere with the 3 ribs of the gear box cover on the left of the gear box window.</p>
G6	<p>The PTO can only be fitted on Mercedes gear boxes with an output flange diameter of max 180 mm. The required quill shaft is included in the adaptor kit. For vehicles produced from June 2002 it's vital to check the shape of the gearbox's opening before mounting the PTO: No extra kit is required if the cover is fixed with 7+4 screws (Mercedes' logo). If the cover is fixed with 8+4 screws (without logo) it's absolutely necessary to order an extra kit besides the quill shaft. Follow carefully the instructions in the documentation enclosed. Total allowed torque, sum of both outputs when both are operated at the same time is limited depending on the speed (RPM) and on the time of PTO use. Up to 1500 RPM the maximum torque is:</p> <p>Maximum CONTINUOUS torque = 450 nm. - max. 10 min. continuous work Maximum INTERMITTENT torque = 500 nm. - max. 2 min. continuous work Maximum PEAK torque = 550 nm. - max. 10 sec. continuous work</p>

NOTES WITH REFERENCE TO PTO FITTING

G7	<p>The PTO can only be fitted on Mercedes gear boxes with an output flange diameter of max 180 mm. The required quill shaft is included in the adaptor kit. For vehicles produced from June 2002 it's vital to check the shape of the gearbox's opening before mounting the PTO: No extra kit is required if the cover is fixed with 7+4 screws (Mercedes' logo). If the cover is fixed with 8+4 screws (without logo) it's absolutely necessary to order an extra kit besides the quill shaft. Follow carefully the instructions in the documentation enclosed. Total allowed torque, sum of both outputs when both are operated at the same time is limited depending on the speed (RPM) and on the time of PTO use. Up to 1500 RPM the maximum torque is:</p> <table data-bbox="488 453 1352 533"><tr><td>Maximum CONTINUOUS torque</td><td>= 450 nm. - max. 10 min. continuous work</td></tr><tr><td>Maximum INTERMITTENT torque</td><td>= 500 nm. - max. 2 min. continuous work</td></tr><tr><td>Maximum PEAK torque</td><td>= 550 nm. - max. 10 sec. continuous work</td></tr></table>	Maximum CONTINUOUS torque	= 450 nm. - max. 10 min. continuous work	Maximum INTERMITTENT torque	= 500 nm. - max. 2 min. continuous work	Maximum PEAK torque	= 550 nm. - max. 10 sec. continuous work
Maximum CONTINUOUS torque	= 450 nm. - max. 10 min. continuous work						
Maximum INTERMITTENT torque	= 500 nm. - max. 2 min. continuous work						
Maximum PEAK torque	= 550 nm. - max. 10 sec. continuous work						
G8	<p>The PTO can only be fitted on Mercedes gear boxes with an output flange diameter of max 180 mm. The required quill shaft and kit for the pump need to be ordered separately. To mount this kit we recommend you to follow the enclosed instructions.</p>						
G9	<p>The PTO can only be fitted on Mercedes gear boxes with an output flange diameter of max 180 mm. The required quill shaft is included in the adaptor kit. For vehicles produced from June 2002 it's vital to check the shape of the gearbox's opening before mounting the PTO: If the cover is fixed with 8+4 screws (without logo) it's absolutely necessary to order an extra kit besides the quill shaft. Follow carefully the instructions in the documentation enclosed. Total allowed torque, sum of both outputs when both are operated at the same time is limited depending on the speed (RPM) and on the time of PTO use. Up to 1500 RPM the maximum torque is:</p> <table data-bbox="488 912 1352 992"><tr><td>Maximum CONTINUOUS torque</td><td>= 450 nm. - max. 10 min. continuous work</td></tr><tr><td>Maximum INTERMITTENT torque</td><td>= 500 nm. - max. 2 min. continuous work</td></tr><tr><td>Maximum PEAK torque</td><td>= 550 nm. - max. 10 sec. continuous work</td></tr></table>	Maximum CONTINUOUS torque	= 450 nm. - max. 10 min. continuous work	Maximum INTERMITTENT torque	= 500 nm. - max. 2 min. continuous work	Maximum PEAK torque	= 550 nm. - max. 10 sec. continuous work
Maximum CONTINUOUS torque	= 450 nm. - max. 10 min. continuous work						
Maximum INTERMITTENT torque	= 500 nm. - max. 2 min. continuous work						
Maximum PEAK torque	= 550 nm. - max. 10 sec. continuous work						
G10	<p>The PTO can only be fitted on Mercedes gear boxes with an output flange diameter of max 180 mm. The required quill shaft is included in the adaptor kit. For vehicles produced from June 2002 it's vital to check the shape of the gearbox's opening before mounting the PTO: If the cover is fixed with 8+4 screws (without logo) it's absolutely necessary to order an extra kit besides the quill shaft. Follow carefully the instructions in the documentation enclosed. Total allowed torque, sum of both outputs when both are operated at the same time is limited depending on the speed (RPM) and on the time of PTO use. Up to 1500 RPM the maximum torque is:</p> <table data-bbox="488 1256 1352 1335"><tr><td>Maximum CONTINUOUS torque</td><td>= 450 nm. - max. 10 min. continuous work</td></tr><tr><td>Maximum INTERMITTENT torque</td><td>= 500 nm. - max. 2 min. continuous work</td></tr><tr><td>Maximum PEAK torque</td><td>= 550 nm. - max. 10 sec. continuous work</td></tr></table>	Maximum CONTINUOUS torque	= 450 nm. - max. 10 min. continuous work	Maximum INTERMITTENT torque	= 500 nm. - max. 2 min. continuous work	Maximum PEAK torque	= 550 nm. - max. 10 sec. continuous work
Maximum CONTINUOUS torque	= 450 nm. - max. 10 min. continuous work						
Maximum INTERMITTENT torque	= 500 nm. - max. 2 min. continuous work						
Maximum PEAK torque	= 550 nm. - max. 10 sec. continuous work						

NOTES WITH REFERENCE TO PTO FITTING

G11	<p>PTO for gear box with electronic shift (no CLUTCH pedal). In case the truck is not equipped with electric kit to operate PTO (push button, electro valve, cables,..) please get in contact with our technical department. The required quill shaft is included in the adaptor kit. Total allowed torque, sum of both outputs when both are operated at the same time is limited depending on the speed (RPM) and on the time of PTO use. Up to 1500 RPM the maximum torque is:</p> <p>Maximum CONTINUOUS torque = 450 nm. - max. 10 min. continuous work Maximum INTERMITTENT torque = 500 nm. - max. 2 min. continuous work Maximum PEAK torque = 550 nm. - max. 10 sec. continuous work</p>
G12	<p>PTO for gear box with electronic shift (no CLUTCH pedal). In case the truck is not equipped with electric kit to operate PTO (push button, electro valve, cables,..) please get in contact with our technical department. The required quill shaft is included in the adaptor kit. Total allowed torque, sum of both outputs when both are operated at the same time is limited depending on the speed (RPM) and on the time of PTO use. Up to 1500 RPM the maximum torque is:</p> <p>Maximum CONTINUOUS torque = 450 nm. - max. 10 min. continuous work Maximum INTERMITTENT torque = 500 nm. - max. 2 min. continuous work Maximum PEAK torque = 550 nm. - max. 10 sec. continuous work</p>
G13	<p>The PTO can only be fitted on gear boxes with an output flange with outside diameter of max 180 mm. The required quill shaft for this PTO is included in the adapter kit. Total allowed torque, sum of both outputs when both are operated at the same time is limited depending on the speed (RPM) and on the time of PTO use. Up to 1500 RPM the maximum torque is:</p> <p>Maximum CONTINUOUS torque = 450 nm. - max. 10 min. continuous work Maximum INTERMITTENT torque = 500 nm. - max. 2 min. continuous work Maximum PEAK torque = 550 nm. - max. 10 sec. continuous work</p>
G14	<p>For chassis having spring leaf suspensions due to reduced mounting space you can only use a small gear pump or a bent axis piston pump with a small dimension. Please ask Hyva for assistance.</p>
ADAPTER KIT RELATED NOTES	
A1	<p>Heavy Duty applications which require frequent PTO engagement should be fitted with the heavy duty adaptor kit with special connection to replace the standard kit to prevent excessive wear. Please contact Hyva.</p>
A2	<p>PTO suitable for Mercedes gear boxes with cooling oil pump on the PTO mounting flange. Please contact Hyva for adaptor kit.</p>

NOTES WITH REFERENCE TO PTO FITTING

CONTROL RELATED NOTES	
C1	For this mechanically driven PTO it is important to apply the appropriate cable control with bayonet fitting.
C2	Trucks without air circuit can be fitted with the Hyva 'air-pack' to control this pneumatically operated PTO.
C3	Vacuum shift PTO for which the 12V kit (021417000) including solenoid valves, pipes and fittings needs to be ordered.
C4	This electromagnetically controlled PTO requires an electric kit in 12V or 24V version with features to drive only PTO or PTO/Valve combination.
C5	PTO for electronic gear box (no clutch pedal). For Iveco Eurotronic, Iveco Stralis and any other truck brand contact Hyva.
C6	<p>Instructions for correct dis-/engagement of the PTO:</p> <p><i>PTO engagement</i></p> <ol style="list-style-type: none"> 1) on stationary truck, press the clutch pedal and select the low speeds 2) engage the PTO and engage the speed as instructed by the PTO utilisation RPM. 3) release the clutch pedal <p><i>PTO disengagement</i></p> <ol style="list-style-type: none"> 1) press the clutch pedal and put the gearbox in neutral position 2) disengage the P.T.O. 3) release the clutch pedal
C7	Eaton-E PTO must work only by selecting the high-gears-range. Therefore fit the low gears inhibitor INTERLOCK.
C8	This Eaton-E PTO must work only by selecting the low-gears-range. Therefore fit the low gears inhibitor INTERLOCK.
C9	<p>Instructions for correct dis-/engagement of the PTO: ATTENTION: output PTO speed as per our scheme is estimated.</p> <p><i>PTO engagement</i></p> <ol style="list-style-type: none"> 1) on stationary truck, press the clutch pedal and select the low speeds 2) engage the PTO and engage the speed as instructed by the PTO utilisation RPM. 3) release the clutch pedal <p><i>PTO disengagement</i></p> <ol style="list-style-type: none"> 1) press the clutch pedal and put the gearbox in neutral position 2) disengage the P.T.O. 3) release the clutch pedal
C10	This electromagnetically controlled PTO requires an electric kit in 12V or 24V version with features to drive only PTO or PTO/Valve combination. For smoother vehicles 2 different kits are available. One for gear boxes until December 2007 and the other for gear boxes starting from January 2008 (Series Evolution).

NOTES WITH REFERENCE TO PTO FITTING

MOUNTING KIT RELATED NOTES	
M1	For correct mounting it is obligatory to use the listed / related mounting kit containing gaskets, spacer plate, studs and nuts.
M2	PTO for Mercedes G-100 gearbox could have the PTO's opening built in the gearbox's BODY-PUMP. In that case it is necessary to use our body pump ring. For HEAVY DUTY applications of the PTO (compressors, cranes, etc.) we suggest to mount the lubrication kit. For the assembly of either kit we recommend to observe the enclosed procedures.
M3	For vehicles produced from June 2002 it's vital to check the shape of the gearbox's opening before mounting the PTO: If the cover is fixed with 8+4 screws (without logo) it's absolutely necessary to fit the extra kit besides the quill shaft. Follow carefully the instructions in the documentation enclosed.
M4	PTO for gear box with electronic shift (no CLUTCH pedal). In case the truck is not equipped with electric kit to operate PTO (push button, electro valve, cables,..) please get in contact with our technical department.
M5	PTO for gear box with electronic shift (no CLUTCH pedal) and RETARDER. In case the truck is not equipped with electric kit to operate PTO (push button, electro valve, cables,..) please get in contact with our technical department.
M6	PTO only for cardan shaft transmissions. Due to vehicle overall dimensions it is not possible to mount the pump directly to the PTO. We have available a complete kit composed by bracket, shaft, flange, screws that once connected to the gearbox enables the direct connection of gear pumps or bent axis piston pumps. Please check on PTO catalogue sheet in order to select the correct kit.
M7	The PTO can only be fitted on Eaton-E gear boxes with an output flange diameter of max 165 mm. For gear boxes with bigger flange consult our technical department. For PTO's and technical data please refer to EATON gearboxes section.
QUILL SHAFT RELATED NOTES	
Q1	Make sure the correct quill shaft is selected for the Iveco gear box dependent on the production date. Before 11-02-1998 a different quill shaft is required.
Q2	Make sure the correct quill shaft is selected for this ZF gearbox. Gear box ZF ending with last part numbers below 100 (f.i. xxx 096) the triangular quill shaft must be ordered. Gear box ZF ending with last part numbers above 100 (f.i. xxx 102) the Z=14 DIN5480 quill shaft must be ordered (021314002).
Q3	Make sure the correct quill shaft is selected for this ZF gearbox. Gear box ZF ending with last part numbers below 100 (f.i. xxx 096) the triangular quill shaft must be ordered (021314006). Gear box ZF ending with last part numbers above 100 (f.i. xxx 102) the Z=14 DIN5480 quill shaft must be ordered (021314000).

NOTES WITH REFERENCE TO PTO FITTING

Q4	<p>Make sure the correct quill shaft is selected for this ZF gearbox. Gear box ZF ending with last part numbers below 100 (f.i. xxx 096) the triangular quill shaft must be ordered (021314006). Gear box ZF ending with last part numbers above 100 (f.i. xxx 102) the Z=14 DIN5480 quill shaft must be ordered (021314000). Heavy Duty applications (crane, compressor, etc.) require a lubrication kit for which we ask you to contact Hyva.</p>
Q5	<p>Make sure the correct quill shaft is selected for this Mercedes gear box. Gear boxes - 1st generation produced till January 1990 require the quill shaft with American key. Gear boxes - 2nd generation, produced till 20-07-1991 and with gear box number below 206784 require Z=30 toothed shaft. Follow carefully the instructions in the documentation enclosed with the quill shaft.</p>
Q6	<p>PTO can only be mounted on 3rd generation gear boxes produced after 20-07-1991, with gear box numbers higher than 206784. With vehicles produced from June 2002 it's vital to check the shape of the gearbox's opening before mounting the PTO: No extra kit is required if the cover is fixed with 7+4 screws (Mercedes' logo). If the cover is fixed with 8+4 screws (without logo) it's absolutely necessary to order an extra kit besides the quill shaft. Follow carefully the instructions in the documentation enclosed.</p>
TORQUE RELATED NOTES	
T1	<p>When on this twin output PTO both connections are used simultaneously the sum of the 2 applied torques should not exceed the torque given for single use.</p>
T2	<p>When on this twin output PTO both connections are used simultaneously the sum of the 2 applied torques should not exceed 600 Nm.</p>
